

I'm not going to pretend to fully understand the issue, or that i've even heard a fair amount from both sides. I will say that it is the constant lack of attention paid to the civil liberties of the people, by the government, that prompts me to file this complaint. All I ask is that those who have the power to restrict our liberties remember who they work for, and what the long term affect of any use of power may have in precedent or other form. Thank you for you time.
